

Senior Project Geologist (Coal)

Brisbane based with some site requirement

- Exciting opportunity to be part of a rapidly developing business
- Multiple exploration projects in Qld, NT and NSW
- Innovative thinking and project genesis

Waratah Coal Pty Ltd is an innovative coal company recently acquired by Mineralogy Pty Ltd. The Company has exploration and development projects located in Queensland, New South Wales and the Northern Territory.

The Company recently announced the development of the China First Project, a 40Mt pa mining venture in the Galilee Basin. The Company is the largest tenement holder in the Galilee Basin and has already established resources and reserves in excess of 5 Billion tonnes. The China First Project includes the construction of a 490km standard gauge rail to the port of Abbot Point and port facilities for export. The project is valued at \$7.466B and has received financial backing from Metallurgical Corporation of China Limited.

As the project moves closer to construction, we seek the services of qualified geologists to manage exploration activities on allocated projects.

Resource modelling experience will be highly regarded for one of the senior roles.

This role may lead significant career advancement and applicants are encouraged to define their longer term goals.

Competitive remuneration package will be paid commensurate with the quality of the candidate.

Post: GPO Box 89, Brisbane QLD 4001

Reporting to the Vice President - Exploration you will be responsible for:

- Maintaining the project tenements in good keeping
- Ensuring statutory obligations are met
- Engaging and overseeing drilling and other contractors imparting a work ethic in keeping with efficient and safe standards
- Effective community and landholder liaison
- Ensuring the accurate and efficient collection and interpretation of the project geological data
- Creation and maintenance of an effective geological database for the projects including historical and recent data
- Managing the project to ensure that timeframes and goals are consistent with those of the Company
- Statutory and internal reporting and project evaluation

Ideally you will possess:

- A positive work ethic with a result focus
- Effective communication skills being able to deal with a variety of stakeholders
- Previous experience in coal exploration
- A proven track record of organisation ability
- A tertiary qualification in geology - backed with practical experience
- Experience with relevant geological software
